Mike,

Yesterday I asked Darius if he could tell where ATSDR's funding came from for the Nutronics site. He said you'd be the best person to ask on this one. Supposedly there is some way that ATSDR codes its costs when they are submitted. We aren't anticipating issuing a demand letter at this point, but I do need to start writing a close out memo asap. Any way you could help would be appreciated!

Thanks,
Debbie

Mike:

From what I've recently learned, whether or not we seek to recover ATSDR's costs depends upon how ATSDR funded its work. If the funds came from grant money, then we would try to recover those costs for them. Do you happen to know if there's any reasonable way to find this out before we have another ICS run to include the costs? Right now we are looking at closing the costs out, unless we happen to find new PRPs. We don't know if we will need to issue a new demand letter or not.

Thanks,
Debbie (3-7632)

Peter & Deb:

The attached ICS represents costs through December 31, 2013 for the Nutronics site B5XR – which does not include ATSDR costs. Please let us know if you need a certified cost package and/or ATSDR costs for your possible demand letter.

Thanks,

Mike
